

MEMORANDUM

February 10, 2016

TO: Board Members

FROM: Terry B.Grier, Ed.D.
Superintendent of Schools

SUBJECT: **VANGUARD PROGRAM EVALUATION: 2014–2015**

CONTACT: Carla Stevens, 713-556-6700

According to Section 29.123 of the Texas Education Code, the *Texas State Plan for the Education of Gifted/Talented Students* (G/T) forms the basis of program accountability for state-mandated services for G/T students. In the Houston Independent School District, G/T students were served through one of two program designs: Board-approved Vanguard/Magnet or Vanguard Neighborhood. Attached is the evaluation report summarizing the effectiveness of the Vanguard Program during the 2014–2015 school year.

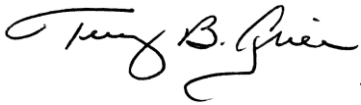

The state plan outlines three different performance measures that may be viewed as a continuum: In Compliance, Recommended, and Exemplary. There are five components that are addressed in the plan: Student Assessment, Program Design, Curriculum and Instruction, Professional Development, and Family-Community Involvement. In 2007–2008, HISD implemented fourteen Vanguard Standards that were aligned to the five components of the *Texas State Plan*. The evaluation report centered on measuring the effectiveness of the Vanguard Program based on the state's five components and comparing year nine of implementation of the Vanguard Standards with baseline data from 2006–2007. The Vanguard program supports the district's strategic direction by supporting initiatives 1 and 3 by having an effective teacher in every classroom and rigorous instructional standards and supports.

Key Findings:

- In 2014–2015, a total of 33,061 students attending 262 elementary, middle, and high schools were identified as G/T for the district's Vanguard Program, reflecting an **increase** in participation by 155 students when comparing 2013–2014 to 2014–2015.
- When comparing the demographic profile of those participating in the Vanguard Program to the district's demographic profile, African American, Hispanic, and economically disadvantaged students were **underrepresented**, while, White and Asian students were **overrepresented**.
- For 2015, a total of 11,161 Advanced Placement (AP) exams were taken by 5,065 G/T students and 51.9 percent of the scores were three or higher on a scale of one to five, showing an **increase** in participation rates (38.7 percent) of 25.4 percentage points from 2007.
- For 2015, advanced levels of performance on the STAAR English for G/T students in grades 3–8, ranged from 29 percent in writing to 52 percent in reading. Advanced level of performance for first-time testers on the STAAR End-of-Course exams ranged from 20 percent in English II to 65 percent in Algebra I.
- For 2015, a total of 11,161 Advanced Placement (AP) exams were taken by 5,065 G/T students and 51.7 percent of the scores were three or higher on a scale of one to five, showing an **increase** in participation rates of 25.4 percentage points from 2007.
- On the fall 2014 PSAT results for eleventh grade, 1,849 or 96 percent of eleventh grade G/T students took the PSAT, and 68.8 percent met the College Readiness Benchmark of 142; this is an **increase** in participation and performance compared to the previous year.

- A total of 1,632 G/T students or 99 percent of the 2014 graduating class took either the SAT or ACT and almost half (49.0 percent) met the TEA standard of 1110 or higher (critical reading or mathematics) and/or 65.0 percent met the TEA standard of 24 or higher (composite) on the ACT. This reflects **decreases** of 6.5 percentage points in SAT and 2.8 percentage points for ACT performance compared to the class of 2013.

Should you have any further questions, please contact Carla Stevens in the Department of Research and Accountability at 713-556-6700.

VANGUARD PROGRAM EVALUATION

FINDINGS RELATED TO STATE COMPLIANCE, 2014–2015

Executive Summary

Program Description

According to the Texas Education Code §29.121 and the Houston Independent School District (HISD) Board Policy, Gifted and Talented (G/T) students are “those identified by professionally qualified persons, who perform at, or show the potential for performing at a remarkably high level of accomplishment when compared to others of the same age, experience, or environment. These are students who require differentiated educational programs and/or services beyond those normally provided by the regular school program in order to realize their contribution to self and society. Students capable of high performance include those with demonstrated achievement and/or high potential ability in any of the following areas:

- Exhibits high performance capability in an intellectual, creative, or artistic area;
- Possesses an unusual capacity for leadership; or,
- Excels in a specific academic field (Houston Independent School District, 2014a, p. XXIV-1).”

The *Texas State Plan for the Education of Gifted/Talented Students* (herein referred to as the Texas State Plan) represents the accountability plan for measuring the performance of districts in providing state-mandated services to students identified as G/T (Texas Education Agency, 2009). The State Board of Education approved revisions in September 2009. The Texas State Plan outlines three different performance measures that may be viewed as a continuum: *In Compliance*, *Recommended*, and *Exemplary*. All districts are required to meet the accountability measures set forth under the *In Compliance* category. In addition, the state plan is to serve as a guide for improving program services. To accomplish this, districts and campuses may review the recommended and exemplary measures to improve student services that are not mandated (Texas Education Agency, 2009).

The purpose of this evaluation was to comply with state mandates requiring school districts to evaluate the effectiveness of the Vanguard Program annually (TEC §11.251–11.253). Consequently, this evaluation focused on the degree to which the Vanguard Program operated in compliance with the policies and procedures developed by the legal and administrative authorities as well as the District’s 14 G/T Standards approved by the Board of Education on March 8, 2007 (**Table 1**, p.21). The score card reflecting the degree to which HISD’s Vanguard Program adheres to the Texas State Plan is provided in **Appendix A** (pp. 33–37). In addition, the 2010 National Association for Gifted Children (NAGC) released their programming standards, and these have been aligned to the Texas State Plan (Johnsen, 2011). The Vanguard Program supports the district’s strategic direction by having an effective teacher in every classroom and rigorous instructional standards and supports. Specific measures of compliance include the following five components of the Texas State Plan:

1. Student Assessment (align to HISD Vanguard (G/T) Standards 2, 3, 4, and 13) (**Figure 1A**, p. 2),
2. Service Design (align to HISD Vanguard G/T Standards 1, 5, 11, 13, and 14) (**Figure 1B**, p. 2),
3. Curriculum and Instruction (align to HISD Vanguard G/T Standards 6, 7, 8, and 13) (**Figure 1C**, p. 2),
4. Professional Development (align to HISD Vanguard G/T Standards 9, 10, and 13) (**Figure 1D**, p. 2), and
5. Family/Community Involvement (align to HISD Vanguard G/T Standards 12 and 13) (**Figure 1E**, p. 2).

E. Family & Community Involvement

Source: Texas State Plan Score Card, Appendix A

Key Findings:

- In 2014–2015, a total of 33,061 students attending 262 elementary, middle, and high schools participated in the district's Vanguard Program, reflecting 16.6 percent of the district K–12 population, representing a slight **decrease** from 16.9 percent in 2013–2014; however, 155 more students participated in 2014–2015 than in 2013–2014.
- When comparing the demographic profile of those participating in the Vanguard Program to the district's demographic profile, African American, Hispanic, and economically disadvantaged students were **underrepresented**, while, White and Asian students were **overrepresented**.
- For 2015, G/T students overwhelmingly met satisfactory levels of performance on STAAR English and Spanish in all subject areas; advanced levels of performance on the STAAR English ranged from 29 percent in writing to 52 percent in reading, and on the STAAR Spanish advanced performance levels ranged from 30 percent in writing to 41 percent in reading.
- For 2015, first-time testers on the STAAR End-of-Course exams scored 65 percent in Algebra, 51 percent in biology, 35 percent in English I, 20 percent in English II, and 56 percent in U.S. History at the advanced level of performance.
- For 2015, a total of 11,161 Advanced Placement (AP) exams were taken by 5,065 G/T students and 51.7 percent of the scores were three or higher on a scale of one to five, showing an **increase** in participation rates (38.7 percent) of 25.4 percentage points from 2007.

- In May of 2015, 372 HISD G/T students took a total of 1,146 International Baccalaureate (IB) examinations, where 57.2 percent scored a four or above on a scale from one to seven. This reflects an **increase** in participation of 59 students from 2007.
- On the fall 2014 PSAT results for eleventh grade, 1,849 or 96.0 percent of eleventh grade G/T students took the PSAT, and a total of 1,272 or 68.8 percent met the College Readiness Benchmark of 142; this is an **increase** in participation and performance compared to the previous year.
- A total of 1,632 G/T students or 98.7 percent of the 2014 graduating class took the SAT and/or the ACT and 49.0 percent met the TEA standard of 1110 or higher (critical reading and mathematics) and/or 65.1 percent met the TEA standard of 24 or higher (composite) on the ACT. This reflects **decreases** of 6.5 percentage points in SAT and 2.8 percentage points for ACT performance compared to the class of 2013.
- Based on the Vanguard Standards Review form returned by 165 elementary and 80 secondary campuses, there were 165 elementary teachers at 53 campuses and 193 secondary teachers at 28 campuses who were not G/T trained, but taught G/T students during the 2014–2015 school year.
- Based on the percentage of items in compliance on the Texas State Plan Score Card, of the five components, percentages ranged from 0 percent for professional development to 83 percent for student assessment.

Recommendations

1. For a more equitable program for underrepresented groups, consideration should be given to using a defensible, published identification system, incorporating published rating scales (i.e. *Scales for Rating the Behavioral Characteristics of Superior Students*), expanding program services (i.e. language development, creative, the arts, and leadership), and having parents opt-out of the program rather than opt-into the program.
2. In accordance with TEC §§11.251–11.253 of the Texas State Plan, provisions to improve services to gifted/talented students as well as the results of this evaluation should be reflected in the district and campus improvement plans.
3. Align program services with the assessments given. To be in compliance with state mandates, the district is required by law to include assessments to evaluate social studies and science. If program services expand to include creativity, the arts, and leadership, these areas will need to be assessed.
4. Develop personalized Gifted Education Plans by school detailing how schools plan to meet the individual academic needs of each gifted student, establish campus based committees to help identify gifted students and develop and carry out the personalized plans, and create a centralized database so that progress and rigor can be monitored and evaluated.
5. Ensure that all employees that make district-level decisions regarding the Vanguard (G/T) Program meet the professional development standards outlined in the Texas State Plan, including Board Members, since the board of trustees of a school district has the responsibility to ensure that the district or school complies with all applicable state educational programs (TEC §7.208). To accomplish this, the district should create a data base that tracks G/T professional development for all staff and Board Members so that program personnel can monitor activity.
6. Consideration should be given to create Vanguard Neighborhood G/T Centers, similar to Newcomer Centers, so that Vanguard Neighborhood schools have a critical mass of G/T students.
7. Update and align HISD Vanguard Standards with the 2010 Pre-K–Grade 12 Gifted Programming Standards released by the National Association for Gifted Children (NAGC) and the State Plan, including outcome measures and evidence-based best practices and educator professional development (i.e. identifying G/T

characteristics of underrepresented groups, teacher recommendation form/rating scales, and administration of assessments).

Administrative Response

The Advanced Academics Department will implement the following actions to support campuses and increase equity of and access to gifted and talent services.

1. Design new training to include supporting students in the areas of arts, creativity and leadership.
2. Partner with each campus to ensure that all staff have the required GT training and that when possible students are grouped with GT peers.
3. Develop a district wide GT Steering Committee comprised of various stakeholders focused on improving service design in HISD.
4. Oversee district wide GT Expos where students in grades K-12 will have the opportunity to showcase research in a variety of advanced-level products.
5. Work with Schools Offices and the Communications department to establish stakeholder communication protocol.
6. Update school improvement plans (SIP's) to include section about GT at each campus.
7. Establish grade and subject-specific PLC's across HISD that focus on best practices and allow for teacher collaboration.
8. Collaborate with Schools Offices to provide guidelines for selection of campus GT coordinators from a pool of certified non-instructional personnel.
9. For a more equitable program for underrepresented groups, consideration should be given to using a defensible, published identification system, incorporating published rating scales, expanding program services (i.e. language development, creative, the arts, and leadership), and having parents opt-out of the program rather than opt-into the program.

Introduction

In the Houston Independent School District, G/T students are served through one of two program designs: Board-approved Vanguard Magnet or Vanguard Neighborhood. Vanguard Magnet programs (K–12) are designed to serve G/T students, who excel in general intellectual ability, in combination with creative/productive thinking and/or leadership ability. Vanguard Magnet programs provide a learning continuum that is differentiated in depth, complexity, and pacing in the four core areas (reading/language arts, mathematics, social studies, and science). Students have the opportunity to work with their cognitive peers.

The Vanguard Magnet is provided only in Board-approved schools, and entry into Vanguard Magnet programs is competitive. In 2014–2015, the program served students at the following Board-approved locations:

- Jewel Askew (K–4), Edna Carrillo, Lorenzo De Zavala, Gary Herod, Oak Forest, River Oaks, Theodore Roosevelt, William Travis, and Windsor Village elementary schools;
- Frank Black, Luther Burbank, Alexander Hamilton, and Sidney Lanier middle schools;
- Thomas Horace Rogers School; and
- Andrew Carnegie Vanguard High School.

Vanguard Neighborhood programs (K–12) are designed to provide services for G/T students at their neighborhood schools or for non-zoned G/T students on a valid transfer (other than Vanguard Magnet transfers) that meet the criteria for identification established by district guidelines. Vanguard Neighborhood K–12 programs provide a learning continuum that is differentiated in depth, complexity, and pacing in the four core content areas (reading/language arts, mathematics, social studies, and science). All qualified students are served in their Vanguard Neighborhood program because there are no program enrollment goals or qualification distinctions (tiers) in the admission process. All G/T students on the campus are served in G/T classes with appropriately trained/qualified teachers.

The Vanguard Neighborhood program is designed for G/T students who excel in general intellectual ability, in combination with creative/productive thinking and/or leadership ability. The Texas Education Agency (TEA) requires that all kindergarten students have the opportunity to apply for Vanguard Neighborhood during the fall semester, and if qualified, provided services by March 1 of their kindergarten year. To address the different needs of the participating schools, decisions regarding the instructional delivery model are made at the campus level (Houston Independent School District, 2014a).

Other Program/School Options

Other educational opportunities available to all students as well as those identified as G/T included:

- Montessori program, Grades K–5,
- International Baccalaureate Primary Years Programme (IBPYP) Grades K–5,
- International Baccalaureate Middle Years Programme (IBMYP)/Grades 6–10,
- Pre-International Baccalaureate (Pre-IB) Classes (Grades 9–10),
- International Baccalaureate (IB) Degree Programme Grades 11–12,
- AP Spanish Language for Native Spanish Speakers, Grade 8,
- Pre-Advanced Placement (Pre-AP) program Grades 6–10,
- College Board Advanced Placement (AP) program Grades 9–12,
- Dual Credit (Grades 9–12), and,
- High School for Performing and Visual Arts (HSPVA) Grades 9–12.

Methods

Data Collection and Analysis

- Quantitative and qualitative data were collected from a variety of sources including student demographic data bases, program documentation, professional development data files, and student performance data files. Basic descriptive statistics were employed to analyze the data. **Appendix B** (pp.38–39) summarizes the methods used in detail. **Appendix C-1** (pp. 40–41) and **Appendix C-2** (pp. 42–43) show the matrices used to identify G/T students, and **Appendix D** (44–45) depicts the press release regarding proposed changes to the G/T program.

Data Limitations

- For a detailed description of the limitations in using e-TRAIN, the Vanguard Standards Review, and the Public Education Information System (PEIMS) data files, see Appendix B, pp. 38–39.

Results

What program options were provided to G/T students during the 2014–2015 school year, and how does current implementation compare to the Board-approved G/T Standards?

- In HISD, 33,061 G/T students were served through two different program designs, Vanguard Magnet or Vanguard Neighborhood. Out of 283 schools in HISD, 262 campuses identified G/T students based on Fall PEIMS Snapshot data. Of the 262 campuses with G/T identified students, 242 campuses offered a Vanguard Neighborhood program (K–12), 15 campuses offered a Vanguard Magnet program (K–12), and five campuses did not have a Vanguard program for their G/T students.
- For 2014–2015, out of a total of 33,061, 26,946 G/T students participated in the Vanguard Neighborhood program (K–12) compared to 6,115 G/T students who participated in the Vanguard Magnet program. When comparing the percentage of G/T students enrolled by program, 82 percent of G/T students were served through the Vanguard Neighborhood program (K–12), while 18 percent of the G/T students were served through the Vanguard Magnet program (**Figure 1**).

Figure 1. Number of G/T students by program design, 2014–2015

Source: Fall PEIMS Snapshot, 2014

- According to the Texas State Plan, G/T students served in the regular classroom need to work together as a group (minimum of 3) (Texas Education Agency, 2009; Texas Education Agency, 2007–2015). For 2014–2015, there were 83 elementary and secondary campuses that identified fewer than three G/T students for at least one grade level. When comparing 2013–2014 to 2014–2015, there was an **increase** in the number of campuses that had fewer than three G/T students for at least one grade level from 73 to 83 (**Figure 2**). It is not clear if and/or how services were provided.
- In 2014–2015, the number of schools serving G/T students with fewer than three G/T students by grade level ranged from 10 combined schools to 44 elementary schools (Figure 2). A list of G/T enrollment by campus, and grade level, is provided in **Appendix E**, pp. 46–56.

Figure 2. Number of schools with fewer than 3 G/T students identified for at least one grade level, 2009–2010 to 2014–2015

Source: Fall PEIMS Snapshot, 2009–2010 to 2014–2015

- Campuses were required to send a Vanguard Standards Review form to their School Support Officer and Advanced Academics Department showing their instructional delivery model for approval. Data from 165 elementary campuses were compiled to determine how schools planned to implement their G/T instructional model. Out of the 165 elementary campuses that submitted a Vanguard Standards Review Worksheet, 155 campuses (93.4 percent) used cluster classes, 18 campuses (10.8 percent) used homogeneous classrooms, and 14 (8.4 percent) used a combination of cluster and homogeneous classrooms.
- Based on the Vanguard Standards Review form returned by 165 elementary and 80 secondary campuses, there were 165 elementary teachers at 53 campuses and 193 secondary teachers at 28 campuses who were not G/T trained, but taught G/T students during the 2014–2015 school year.

What evidence was there that the instruments and procedures for G/T identification met the standards in the Texas State Plan, and how will implementation of the Board-approved G/T standards continue to ensure equity of opportunity?

G/T Enrollment

- For the 2014–2015 school year, a total of 33,061 students were identified as G/T compared to the district enrollment of 199,023 (Grades K–12). In 2006–2007, a total of 24,376 students were identified as G/T compared to the district enrollment of 186,907. The G/T percentage for the district has **increased** from 13.0 percent in 2006–2007 to 16.6 percent in 2014–2015. However, there has been a slight decline from 16.9 percent in 2013–2014 (**Table 2**, p.22).
- When comparing the G/T percentages by grade level from 2006–2007 to 2014–2015, **increases** occurred for all grade levels with the exception of high school (grades 10–12), where G/T percentages declined by 0.1 percentage point for tenth grade, 3.4 percentage points for eleventh grade, and 2.0 percentage points for twelfth grade (Table 2, p.22).
- The **increase** in the percentage of G/T kindergarten students for 2014–2015 reflects the implementation of a 4-year old assessment program for which entering kindergarten students from neighborhood schools were assessed in the spring of 2015. When these students enrolled in the district during the 2015–2016 school year, the students identified as G/T were coded on the PEIMS database for the fall and the schools received funding (Table 2, p.22).
- The percentage of qualified 4-year old students identified from neighborhood schools **increased** from 25.0 percent in 2007 to 47.0 percent in 2015, and magnet schools **increased** from 45.0 percent in 2009 to 54.0 percent in 2015 (**Appendix F**, pp. 57–60 and **Figure 3**).
- In 2015–2016, a total of 31 Vanguard Neighborhood or early childhood centers and 10 Vanguard Magnet campuses participated in the entering kindergarten assessment program (Appendix F, pp. 57–60).

Figure 3. Percent of qualified 4-year old students entering kindergarten Vanguard Program, 2006–2007 to 2015–2016

Source: Advanced Academics, Summary of Entering Kindergarten Data file, 2014–2015 Vanguard Program Evaluation Report, 2013–2014

- The percentage of G/T students identified at the state level ranged from 7.5 to 7.7 percent over the last nine school years. Comparisons to the state include Early Childhood students in the enrollment counts. Therefore, the percentages are lower than those calculated using only kindergarten through grade 12 (**Figure 4**).
- When comparing state G/T enrollment over the nine-year period, rates have not fluctuated by more than 0.2 percentage point. The percentage of G/T students identified at the district level ranged from 12.0 percent in 2006–2007 to 15.6 percent in 2011–2012, 2012–2013 and 2013–2014 (**Figure 4**).
- When comparing district G/T enrollment over the nine-year period, there was an increase of 3.4 percentage points from 2006–2007. The G/T percentage for the district exceeded that of the state by 8.0 percentage points for 2012–2013 and 2013–2014, and decreased to 7.8 in 2014–2015 (**Figure 4**).

Figure 4. Percent of G/T enrollment, 2006–2007 to 2014–2015 (Early Childhood included)

Source: Academic Excellence Indicator System (AEIS): 2006–07 through, 2011–12; Texas Academic Performance Reports (TAPR): 2012–13 to 2014–15

- African American students comprise 24.8 percent of the total HISD population in grades K–12. These students represent 11.5 percent of the G/T population reflecting an **underrepresentation** of African American students by 13.3 percentage points (**Table 3**, p.23).
- Hispanic students comprise 61.7 percent of the total HISD population in grades K–12, these students represent 57.0 percent of the G/T population reflecting an **underrepresentation** of Hispanic students by 4.7 percentage points (**Table 3**, p.23).
- While economically disadvantaged students comprise 74.3 percent of the total HISD population in grades K–12, these students represent 56.2 percent of the G/T population reflecting an **underrepresentation** of economically disadvantaged students by 18.1 percentage points (**Table 3**, p.23).
- Since 2006–2007, underrepresentation has **decreased** for Hispanic, male, English Language Learners (ELL), Economically Disadvantaged, and Special Education students (**Table 3**, p. 23).
- Since 2006–2007, overrepresentation has **decreased** for White and Asian students (**Table 3**, p. 23).
- African American and Hispanic students apply for Vanguard Magnet schools at **disproportionately lower** rates than they are represented in the HISD kindergarten and entering sixth grade populations by 6.6, 33.5, 8.6 and 11.5 percentage points, respectively (**Table 4**, p. 24).
- For kindergarten applicants, 51.2 percent of African American and 56.4 percent of Hispanic students who were identified as G/T during the universal assessment in 2014–2015, accepted, and enrolled in an HISD

school for the 2015–2016 school year. As of October 26, 2015, 79.7 percent of the African American and 89.5 percent of Hispanic students who accepted and enrolled in the district were identified as G/T on the Chancery Student Management System. This may, in part, be attributed to parents who did not opt-in for G/T services (Table 5, p. 25).

- For sixth grade, 62.1 percent of African American and 54.6 percent of Hispanic students who were identified as G/T during the universal assessment in 2014–2015, accepted, and enrolled in an HISD school for the 2015–2016 school year. As of October 26, 2015, 80.2 percent of African American and 89.0 percent of Hispanic students who accepted and enrolled in the district were identified as G/T on the Chancery Student Management System. This may, in part, be attributed to parents who did not opt-in for G/T services (Table 5, p. 25).
- When comparing the racial/ethnic percentages of G/T students in the Vanguard Magnet program only with those districtwide, the data indicate that Hispanic and African American students are **underrepresented** in the program as a whole; whereas, White and Asian students are **overrepresented** (Table 6, p. 25).
- When examining the racial/ethnic composition of G/T students by Vanguard Magnet school, the percentage of African American students ranged from 0.5 percent at De Zavala to 45.4 percent at Windsor Village. For Hispanic students, the percentages ranged from 12.8 percent at TH Rogers ES/MS to 99.0 at De Zavala. The percentage of White students ranged from 0.0 percent at De Zavala to 57.0 percent at Travis, while the percentage of Asian students ranged from 0.3 at Windsor Village to 56.2 percent at TH Rogers ES/MS (Table 6, p. 25).
- A total of 38.7 percent of the Vanguard Magnet students were considered to be economically disadvantaged, although this figure varied across campuses from a low of 9.4 at River Oaks Elementary School to a high of 93.7 at Burbank Middle School (Table 6, p.25).
- Demographic characteristics comparing the G/T student population of the district to the state shows the same inequity for African American, Hispanic, and economically disadvantaged students for the 2013–2014 school year. There is an **overrepresentation** of Asian and White students and an **underrepresentation** of African American, Hispanic, and economically disadvantaged students for both the district and the state (Figure 5).

Figure 5. Demographic Characteristics Comparing Gifted and Talented to the K-12 Student Population of the District and the State, 2013–2014

Source: Texas Education Agency, Enrollment Trends, Enrollment in Texas Public Schools, 2013–2014, [most recent state results publicly available]; Fall PEIMS Snapshot, 2013–2014.

G/T Exits

Students may be exited from the G/T program for the following reasons: 1) students fail to achieve academic success, 2) parents may voluntarily exit their child, 3) students fail to meet promotion standards or are retained, 4) students, upon reassessment, do not meet the qualifying score on the G/T matrix (Houston Independent School District, 2014a).

- **Table 7** (p. 26) depicts a cohort of students that were identified as G/T in 2013–2014 and their subsequent status the following year. If students were identified as G/T in 2014–2015, but were not G/T in the 2013–2014 school year, they were not included in the analysis.
- For the 2013–2014 school year, there were 3,357 first grade students who were identified as gifted and talented. Of the 3,357 G/T students identified, 3,089 retained their G/T identification in 2014–2015, while 260 or 7.7 percent did not return to HISD the following year and 8 were exited from the G/T Program (Table 7, p. 26).
- During the district's universal G/T assessment that takes place during fifth grade for sixth grade G/T services, 1,201 G/T students were exited from the program. Of those, 922 (76.8 percent) were Hispanic, 186 (15.5 percent) were African American, 66 (5.5 percent) were White, 18 (1.5 percent) were Asian, 6 (0.5 percent) were identified as Two or more races, and 3 (0.2 percent) were American Indian (**Tables 7–9**, pp. 26–27).
- The average attendance for the 1,674 G/T students who were exited from the program was 97.7 percent. The minimum percentage for attendance was 48.00, the maximum and most frequently occurring (mode) percentage was 100, and the median percentage was 98.9 (**Table 10**, p. 27).
- Of the 1,674 G/T students who were exited from the G/T Program, a total of 113 students had a total of 205 disciplinary infractions (**Table 11** and **Table 12**, pp. 27–28).
- African American and Hispanic students comprise the largest proportion of students who were exited from the G/T Program and had a disciplinary action incident (Table 12, p. 28).
- The highest number of students who were exited from the G/T Program occurred in grade 5 with average reading scores being 52 NCEs and average mathematics scores being 63 NCEs (**Table 13**, p. 28).
- On the 2013–2014 Stanford, the lowest average NCE scores among exited G/T students was for reading and mathematics in grade 2 (49 NCEs and 55 NCEs respectively) (Table 13, p. 28).
- On the 2013–2014 Stanford, the highest average reading and mathematics NCE scores for exited G/T students were in grade 8 (67 NCEs and 77 NCEs, respectively) (Table 13, p. 28).
- On the 2013–2014 Aprenda, reading NCE scores ranged from 76 in grade 1 to 95 in grade 2, and mathematics NCE scores ranged from 82 in grade 1 to 97 in grade 2 (**Table 14**, p.28).

What evidence existed to document positive student performance trends for students participating in the gifted program?

- According to HISD Vanguard (G/T) Standard 8–Student Success (Expectations), G/T students were expected to perform above grade level, defined as achieving a 61 National Percentile Rank (NPR) or greater on the Iowa and/or the Logramos, both norm-reference tests. Iowa data from 2015 indicated that there was no grade level for which 100 percent of the G/T students scored a 61 NPR or higher. Scores ranged from 55 percent in grade 5 reading to 91 percent in grade 1 in reading and grades 2 and 3 in mathematics. The HISD Vanguard G/T standard was not met (**Table 15**, p.29).
- **Figure 6** summarizes the combined percent of G/T students in grades 1–8 scoring 61 NPR or higher on the Iowa for 2015. The reading subtest reflected the lowest scores for the percentage scoring 61 NPR or higher at 69 percent. On the mathematics subtest, the highest percentage of students scored a 61 NPR or higher at 86 percent.

Figure 6. Percent of G/T students in grades 1–8 scoring 61 NPR or higher on the Iowa, Spring 2015

*Reading and Language Arts are subtests of the ELA Total.
Source: Iowa data file, 2015

- For 2015, Logramos achievement test results indicated that there was no grade level for which 100 percent of the G/T students scored a 61 NPR or higher. Scores ranged from 87 percent in grade 2 for social science to 98 percent in grade 1 for ELA, grades 1 and 2 for mathematics, and grade 1 for reading. The HISD Vanguard G/T standard was not met (**Table 16**, p.29 and **Figure 7**).

Figure 7. Percent of G/T students in grades 1–4 scoring 61 NPR or higher on the Logramos, Spring 2015

*Reading and Language Arts are subtests of the ELA Total.
Source: Logramos data file, 2015

- For 2015, G/T students in grades 3–8 scored satisfactory performance results ranging from 92 percent on STAAR English social studies to 97 percent on STAAR English mathematics. However, at the advanced level, results ranged from 29 percent on STAAR English writing to 52 percent on STAAR English reading (**Figure 8** and **Table 17**, p. 30).

Figure 8. Percent of G/T student performance on STAAR English (grades 3–8 combined), Spring 2015

Source: STAAR data files, 2015;
First Administration for Grades 5 and 8.

- For 2015, 94 percent of G/T students in grades 3–4 scored satisfactory on the STAAR Spanish mathematics test, reflecting the highest level of achievement of the three tests for meeting the phase-in standard, whereas reading reflected the lowest of the three tests for meeting the satisfactory phase-in standard as well as the highest of the three tests for meeting advanced performance level at 91 percent and 41 percent, respectively (**Figure 9** and **Table 18**, p. 30).

Figure 9. Percent of G/T student performance on STAAR Spanish (grades 3–4 combined), Spring 2015

Source: STAAR data files, 2015

Note: There were no G/T fifth grade students who tested on STAAR Spanish.

- For 2015, 10,237 G/T students were first-time testers on at least one of the five STAAR End-of-Course exams. Since students may take more than one end-of-course exam, this reflects a duplicated count. The

lowest percentage of students scoring in the satisfactory range was associated with the English II exam, where 95 percent of G/T test-takers scored satisfactory and 20 percent scored at the advanced performance level. Algebra I reflected the exam for which the highest percentage of G/T students scored advanced (65 percent), and 100 percent of G/T students scored satisfactory on the Biology End-of-Course exam, reflecting the highest percentage for the Satisfactory phase-in-1 standard (**Figure 10** and **Table 19**, p. 30).

Figure 10. Percent of G/T student performance on STAAR End-Of-Course Exams, Spring 2014 & 2015

Source: STAAR data file, 2015; First-Time Tested Students Only

- When comparing 2007 to 2015 AP participation, the number of G/T high school students taking AP tests **increased** by 70.3 percent from 2,974 in 2007 to 5,065 in 2015 (**Figure 11** and **Appendices G–H**, pp. 61–63).
- When comparing 2007 to 2015 AP participation rates, the percentage of G/T students taking AP tests **increased** by 25.4 percentage points from 38.7 percent in 2007 to 64.1 percent in 2015 (Figure 11 and Appendices G–H, pp. 61–63).

Figure 11. Percent of G/T students taking AP tests, Spring 2007–2015

Note: N=number of G/T students taking at least one AP test.

Source: 2015 College Board AP data file; retrieved August 14, 2015; HISD Research and Accountability, Vanguard Program Evaluation Report, 2013–2014

- When comparing 2007 to 2015 AP performance, the number of exams taken **increased** from 6,416 exams in 2007 to 11,161 exams in 2015 (Appendices G–H, pp. 61–63, and **Figure 12**).
- When comparing 2007 to 2015 AP performance, the percentage of exams scoring three or higher **decreased** from 57.0 percent in 2007 to 51.7 percent in 2015 (Appendix G–H, pp. 61–63 and Figure 12).

Figure 12. Percent of G/T students scoring 3 or higher on AP tests, Spring 2007–2015

Note: N=number of exams with a score of 3 or higher.

Source: 2015 College Board AP data file; retrieved August 14, 2015; HISD Research and Accountability, Vanguard Program Evaluation Report, 2013–2014

- In May of 2015, 372 HISD G/T students took a total of 1,146 International Baccalaureate examinations (IB), where 57.2 percent scored a four or above on a scale from one to seven. This reflects an increase in participation since 2007. With the exception of 2013, the percentage of G/T IB exams scoring 4 or higher has **declined** from 81 percent in 2007 to 57 percent in 2015 (**Table 20**, p. 31 and **Figure 13**).
- For 2015, 12 Bellaire and 31 Lamar high schools G/T students earned an IB diploma. The number of G/T students earning an IB diploma decreased districtwide from 84 in 2007 to 43 in 2015 (**Table 21**, p. 31).

Figure 13. Percent of G/T students taking IB tests and percentage scoring 4 or higher, Spring 2007, 2011, 2012, 2013, 2014, and 2015

Source: International Baccalaureate Organization Candidate Results, 2015; Vanguard Program Evaluation Report, 2013–2014

- On the fall 2014 PSAT results for eleventh grade, 1,849 or 96.0 percent of G/T students took the PSAT, and a total of 1,272 or 68.8 percent met the College Readiness Benchmark of 142; this reflects an **increase** in both participation and performance compared to the previous year (**Appendix I**, pp. 64–65 and **Figure 14**).

Figure 14. G/T participation and performance on the PSAT (Fall), ACT, and SAT, 2012–2013 through 2014–2015

Source: PSAT data file, 2014; ACT data file, 2014; SAT School Day data file, 2014 and SAT data file 2013–2014; Fall PEIMS Snapshot, 2014; Vanguard Program Evaluation Report, 2013–2014. *The methodology used to calculate PSAT College Readiness Benchmark was revised from 152 in Fall 2011 to 142 in Fall 2012 (**Appendix B**, p. 38).

- Out of 31 campuses that tested five or more G/T students on the fall 2014 PSAT, twelve campuses had at least 70 percent of their G/T eleventh grade students reaching the College Readiness Benchmark of 142 (**Appendix I**, p. 64–65 and **Figure 14**).
- For the 2013–2014 school year, a total of 1,632 G/T students or 98.7 percent of the 2014 graduating class took the SAT and/or ACT, and 49.0 percent met the TEA standard of 1110 or higher (critical reading and mathematics) on the SAT and/or 65.1 percent met the TEA standard of 24 or higher (composite score) on the ACT, reflecting **decreases** in SAT and/or ACT participation and performance compared to the class of 2013 (**Appendix J-1**, pp. 66–67 and **Figure 14**).
- Out of 33 campuses with at least five students tested from which G/T students graduated during the 2013–2014 school year, three high schools had at least 70 percent or more of their G/T students with a combined critical reading and mathematics score of 1110 on the SAT; six of the 21 high schools had at least 70 percent of their G/T students with a composite score of 24 or higher on the ACT (**Appendix J-1**, pp. 66–67).
- According to the College Board, a score of 1550 (critical reading, mathematics, and writing sections combined), indicates a student has a 65 percent likelihood of achieving a B- average or higher during the first year of college. Out of 33 campuses with at least five students tested from which G/T students graduated during the 2013–2014 school year, eight high schools had at least 70 percent or more of their G/T students with a combined critical reading, mathematics, and writing score of 1550 (**Appendix J-2**, pp. 68–69).

- According to HISD Vanguard Standard 6–Curriculum and Instruction, G/T students in middle school were required to take Pre-AP and/or International Baccalaureate Middle Years Program (IBMYP) classes in the four core content areas. When comparing 2007 to 2015, the percent of G/T middle school students enrolled in advanced classes in the four core content areas **decreased** from 91.2 percent to 85.2 percent, but the actual number of students taking advanced courses **increased** by 38.7 percent (**Table 22**, p. 31).
- According to Standard 6–Curriculum and Instruction, G/T students in high school were required to take two advanced level classes. When comparing 2007 to 2015, the percent of G/T high school students enrolled in two advanced classes **decreased** from 95.2 percent to 86.6 percent. However, the actual number of students taking advanced courses **increased** by 35.9 percent (**Table 23**, p. 32).
- From 2010–2011 through 2013–2014, 15, 24, 11, and 21 G/T students dropped out of school, reflecting 0.1, 0.2, <0.1, and .17 percent of the grade 7–12 cumulative enrollment (Table 24, p. 32).
- From 2010–2011 through 2013–2014, 1.8 percent, 3.0 percent, 1.6 percent, and 2.1 percent of G/T students did not graduate (Table 24, p.32).

What evidence indicated that personnel involved in the Vanguard Program met the standards of the Texas State Plan regarding professional development and certification?

- For 2014–2015, a total of 1,926 and 960 educators (unduplicated) completed 6 or more hours and/or 30 or more hours of G/T professional development fulfilling the state and district professional development requirements, respectively (**Appendix K**, pp. 70–71).
- For 2014–2015, 2,596 educators completed one or more of the 59 G/T professional development opportunities offered through e-TRAIN for a total of 4,060 courses (Appendix K, pp. 70–71).
- For 2014–2015, 2,593 educators attended at least one Vanguard Coordinator meeting or AP PLC Meeting (Appendix K, pp. 70–71).
- Based on the 2014–2015 HISD Advanced Academics G/T Standards Review, 165 elementary and 193 secondary teachers at 53 elementary and 28 secondary campuses provided instruction for G/T students, but had not completed their G/T training. These 82 campuses were out of compliance with the Texas State Plan.
- Based on the 2014–2015 HISD Advanced Academics G/T Standards Review, 17 counselors and other administrators and 27 principals at the elementary level did not have G/T training certificates on file.
- Based on the 2014–2015 HISD Advanced Academics G/T Standards Review, 27 counselors and other administrators and 24 principals at the secondary level did not have G/T training certificates on file.

To what extent did the district encourage community and family participation in services designed for G/T students?

- Parents serving on the Campus Shared Decision-Making Committee (SDMC) provided input regarding the G/T Standards Review(s) that would be implemented on the campus.
- On the G/T Standards Review, there were schools that indicated their 6 hour update was included on the School Improvement Plan (SIP), however, there was no mention of the G/T training when the submitted SIPs were reviewed.
- For 2014–2015, 37 out of 262 Vanguard schools participated in or hosted a G/T Expo, sharing advanced products with parents, students, and the community.

- A survey was administered to G/T teachers and coordinators in May 2015. A total of 280 respondents submitted the survey, representing 57 schools. The results are summarized in **Appendix L**, pp. 72–74.
- When respondents were asked what strategies were used to serve gifted and talented children, out of 7 listed strategies, differentiation received the highest percentage with 23.4 percent followed by creative activities with 20.8 percent (Appendix L, pp. 72–74).
- On the 2015 Gifted and Talented Teacher and Coordinator Survey, when respondents were asked whether the needs of their gifted and talented children were met, 27.5 percent responded *All of the time*, 66.1 percent responded *Some of the time*, 3.9 percent responded *None of the time*, and 2.5 percent did not provide a response (Appendix L, pp. 72–74).
- Based on the percentage of items in compliance on the Texas State Plan Score Card, of the five components, percentages ranged from 0 percent for professional development to 83 percent for student assessment (Appendix A, pp. 33–37; Figur 1A–1E).
- For the Student Assessment Component on the Texas State Plan, the district conducts a universal assessment in kindergarten and fifth grade and uses both quantitative and qualitative measures for identifying students; however, the district is not fully aligned with the program services offered and the assessments administered.

Discussion

Over the past nine years, the implementation of the HISD Vanguard Program has varied across the district from the program design, rigor, opportunities to work with G/T peers, strategies for serving G/T students, to curriculum and instruction, professional development, and communicating with parents about program implementation. There are campuses that are meeting the needs of high performing students, and these campuses are perceived positively by the community and parents. To help program personnel identify areas of strengths and weaknesses in the program, a Texas State Plan Score Code was developed. The strongest component of the five components in the Texas State Plan centered on Student Assessment. The district conducts two universal assessments, one in kindergarten and one in fifth grade. This is a program strength as there are not gatekeepers for identification. However, program services offered are not fully aligned to the assessments, and that is a concern.

The district developed HISD's Vanguard G/T Standards in 2007 that were aligned to the Texas State Plan to ensure that highly able students were identified and served and to provide consistency regarding implementation across schools. After nine years of implementation, HISD's Vanguard G/T Standards need to be redesigned, including selection of appropriate outcome measures other than student test scores, so that they are aligned with both the state and national standards and appropriate outcome measures need to be selected, especially for Standard 8: Student Success, since the district no longer administers a norm-referenced test. Moreover, there are two national standards, *Learning and Development* and *Learning Environments* that are not fully addressed in the *State Texas Plan* (Johnsen, 2011). Since HISD is a diverse district, teachers need to be cognizant of the affective needs of gifted students, especially those students in poverty, and construct positive learning environments for diverse learners.

The G/T students in the district would benefit from using a published identification system. Lohman and Renzulli (2007) have published a procedure for combining ability scores, achievement scores, and teacher ratings to identify academically talented students. Another resource for identifying gifted students has been published by Susan Johnsen (2004).

Student outcome measures by campus indicate that program implementation is inconsistent and the rigor of the program varies widely throughout the district. There are campuses that have not identified a critical mass of G/T students on their campus (i.e. less than three at a grade level), and some that schedule the G/T students so that they do not have an opportunity to work with their peers. At the secondary level, gifted and talented students are

primarily served through taking Pre-AP/AP and Pre-IB/IB courses. Since the rigor of these courses varies across the district, a better monitoring system needs to be developed with formative feedback on rigor, training, scheduling, and assessments available to campuses so that G/T students are being equitably served. If the School Improvement Plan reflects the goals for the year, each campus should have G/T professional development opportunities on their calendars for 30 hours and for the 6-hour G/T update. Consideration should be given to providing targeted training to the teacher recommendation form used in the matrix along with characteristics of gifted students in poverty and ELL students, since these underserved populations differ in how they express their G/T traits (Slocumb & Olenchak, 2006).

Over the past nine years, the percentage of students in HISD identified as G/T has increased (12.0 percent to 15.4 percent), while G/T enrollment at the state level has essentially not fluctuated (7.5 percent to 7.7 percent). District G/T percentages have exceeded state G/T percentages over the past nine years, with the largest differential occurring for the 2012–2013 and 2013–2014 school years (8.0 percentage points, respectively). These data indicate that the district has an overrepresentation of students in the Vanguard Program, especially when previously published state documentation established that districts should have between three and eight percent of the students identified as G/T (Texas Education Agency, 2002). Moreover, according to the National Association for Gifted Children (NAGC, n.d.), approximately six to ten percent of U.S. children in grades K–12 are gifted.

According to the Texas Education Agency's study, *Equity in Gifted Education*, (2006, p.8), "equity exists when the various population groups are reflected in the same proportions as they are represented in the larger population." Therefore, if 60 percent of the district's population is comprised of Hispanic students, then 60 percent of the identified G/T students should be Hispanic. Based upon this research, African American and Hispanic students are underrepresented and White and Asian students are overrepresented. If socioeconomic status is taken into account, all of the racial/ethnic groups that are economically disadvantaged are underrepresented. However, since 2006–2007, underrepresentation has decreased for Hispanic, male, bilingual, ELL, economically disadvantaged, and special education students. Moreover, the gap has narrowed for White and Asian students.

Program personnel should decide what G/T services need to be offered and select appropriate assessment instruments to identify those students. Consideration should be given to providing G/T students in poverty with language development services. One size does not fit all in terms of G/T services offered (Slocumb & Olechchak, 2006).

The Department of Research and Accountability has conducted an annual evaluation of the Vanguard Program for the past thirteen years (Department of Research and Accountability, 2002; 2003; 2004; 2005; 2006; 2007; 2008; 2009; 2010; 2011; 2012; 2013, and 2014). Data collected from previous evaluations have been used at the administrative and campus levels.

The district continues to move in a positive direction with regard to Family-Community Involvement with the expansion of the Texas Performance Standards Project (TPSP), and the continuation of the G/T Expo. Moreover, the planned changes in the program regarding retaining the G/T designation in fifth grade, expanding content areas in which gifted students can receive support, and developing Personalized Gited Education Plans are promising steps. The Vanguard Program provides the educational foundation for our future leaders. However, for the program to reach its full potential, state, district, and school level support are essential. The commitment on the part of the district to support a program that challenges students reaffirms their strategic intent, which is to make HISD the educational system of choice.

		C	R	E		
A flexible system of viable service options provides a research-based learning continuum that is developed and consistently implemented throughout the district to meet the needs and reinforce the strengths and interests of gifted/talented students.	2.1				The Texas State GT Plan states, <i>"Identified gifted/talented students are assured an array of learning opportunities that are commensurate with their abilities and that emphasize content in the four (4) foundation curricular areas. Services are available during the school day as well as the entire school year. Parents are informed of these options."</i>	Provide g/t school day services at all HISD campuses
	2.2			--	The Texas State GT Plan states, <i>"Gifted/talented students are ensured opportunities to work together as a group, work with other students, and work independently during the school day as well as the entire school year as a direct result of g/t service options."</i>	There are 83 campuses which have less than 3 identified g/t students in a grade level (as per TEA's FAQ #12). Promote awareness and monitor district g/t identification policies
	2.3			--	Standards 5 and 6	
	2.4				Board Policy, 2007

Texas State GT Plan Components, 2010 Section 4: Professional Development Description and Indicators		Texas State GT Plan Continuum			HISD Vanguard Program Standards (2007) and Advanced Academics School Guidelines (2014-2015) Alignment to the Texas State GT Plan	Recommendations to Align with Texas State GT Plan
		C	R	E		
All personnel involved in the planning, creation, and delivery of services to gifted/talented students possess the knowledge required to develop and provide appropriate options and differentiated curricula.	4.1.1				The Texas State GT Plan states, "...Teachers are required to have completed the thirty (30) hours of professional development prior to their assignment at the district's g/t services." HISD provides multiple opportunities for teachers to complete the required 30 hours of g/t training.	However, according to the Standards Review, there are g/t teachers who have not completed the mandatory 30 hours of g/t training. Monitor g/t training and completion by developing a g/t database to track educator enrollment, completion and certification of g/t professional development hours.
	4.1.2	not evaluated			not evaluated	
	4.1.3	not evaluated			not evaluated	
	4.2				The Texas State GT Plan states, "Teachers who provide instruction and services that are a part of the district's defined g/t services receive a minimum of six (6) hours annually of professional development in g/t education that is related to state teacher education standards." HISD provides multiple opportunities for teachers to complete the annual 6 hours of g/t training.	Monitor g/t training and completion by developing a g/t database to track educator enrollment, completion and certification of g/t professional development hours.
	4.2.2	not evaluated			not evaluated	
	4.3				The Texas State GT Plan states, "Administrators and counselors who have authority for service decisions are required to complete a minimum of six (6) hours of professional development..." HISD provides multiple opportunities for educators to complete the annual 6 hours of g/t training.	Monitor g/t training and completion by developing a g/t database to track educator enrollment, completion and certification of g/t professional development hours.
	4.4				The Texas State GT Plan states, "Evaluation of professional development activities for g/t education is ongoing and related to state teacher education standards, and the results of the evaluation are used in making decisions regarding future staff development plans."	Include g/t professional development services in both the DIP and the SIPs
	4.4.2	--	--		Standards 9 and 10	
Percentage in Compliance = 0/4		0%			Green = evidence of districtwide implementation	
					Red = lack of evidence in districtwide implementation

TEXAS STATE PLAN SCORE CARD

Texas State GT Plan Components, 2010 Section 5: Family/Community Involvement Description and Indicators		Texas State GT Plan Continuum			HISD Vanguard Program Standards (2007) and Advanced Academics School Guidelines (2014-2015) Alignment to the Texas State GT Plan	Recommendations to Align with Texas State GT Plan
		C	R	E		
The district involves family and community members in services designed for gifted/talented students throughout the school year.	5.1				Board Policy, 2007	
	5.1.2				Standard 12	
	5.2				The Texas State GT Plan states, "An array of learning opportunities is provided for g/t students in grades K-12, and parents are informed of all g/t services and opportunities."	The program evaluation survey results show lack of awareness of the g/t program, services, and activities. Provide GT program information to parents using a variety of media
	5.2.2	--			The Texas State GT Plan states, "Support and assistance is provided to the district in g/t service planning and improvement by a parent/community advisory committee."	Implement a parent/community advisory committee focused on improving the g/t program.
	5.2.3	--			The Texas State GT Plan states, "Products and achievements of g/t students are shared with the community."	All campuses share g/t student products, performances and achievements within their communities.
	5.2.4	--			The Texas State GT Plan states, "Presentations are given to community groups and organizations to solicit their involvement in services for GT students."	Present g/t program information to districtwide community groups to solicit their involvement
	5.2.5	not evaluated			not evaluated	
	5.3		--	--	Standard 13	
Percentage in Compliance = 3/4		75%			Green = evidence of districtwide implementation	
					Red = lack of evidence in districtwide implementation	

APPENDIX B

METHODS

DATA COLLECTION

Student data were obtained using a variety of sources. For the current academic year, demographic and enrollment data for G/T students were extracted from the PEIMS and Chancery databases. Race was extracted from the fall PEIMS snapshot using the original PEIMS ethnicity discrete categories for comparability to previous years. The program description, entry procedures, and student eligibility criteria were extracted from the current HISD Elementary and Secondary Guidelines, and the District and School Profiles (Houston Independent School District, 2014a and 2014b). Additional documentation including data for the Entering Kindergarten Assessment Program, G/T Standards Review, Professional Development Course listings, G/T Expo, and student performance data, was provided from the manager and coordinators in the Department of Advanced Academics. G/T Coordinators and Teachers were surveyed at the end of the school year to provide information on implementation of the G/T Program. At the G/T Expos, students, parents, and school staff were interviewed.

Information with respect to training in HISD was provided by the Department of Professional Development Services and an extract was used from the HISD e-TRAIN database from June 1, 2014 to May 31, 2015. The e-TRAIN program had the capability to track employee professional development on the individual level, including attendance and completion for each training session.

The percentage of G/T students in the district was extracted from Academic Excellence Indicator Reports (AEIS Reports) (2007–2012) and 2012–2013 to 2014–2015 Student Program Reports.

ACADEMIC PERFORMANCE

Iowa and Logramos National Percentile Rank (NPR) scores were extracted for G/T students by grade level for the current school year. STAAR for grades 3–8 and End-of-Course exams were extracted and analyzed for current year G/T students.

Advanced Placement (AP) test performance data for 2014, along with demographic information supplied by the students, were reported to HISD for each participating campus by the College Board via an electronic data file on August 25, 2015. Student-level data were matched to the PEIMS database to identify those students who were G/T. Students who were not matched were not included in the analysis.

Performance data of HISD students on IB examinations and diplomas awarded were obtained from International Baccalaureate (IB) score reports or from participating schools. Participation and performance were reported by district and school. For the district and individual schools, the number and percent of students scoring a four or better were reported. A score of four or better allowed an IB exam to be used as one of four measures required for the Distinguished Achievement Program. HISD and state policy is not to report grouped scores for fewer than five students.

PSAT performance data for 2014 and fall 2014 PEIMS enrollment for eleventh grade students were extracted to analyze the number and percent of eleventh grade students who tested and scored at or above 142 (College Readiness Benchmark) on the combined reading, mathematics, and writing portions of the PSAT. The methodology for calculating the College Readiness Benchmark was revised by the College Board in 2012; previously, the College Readiness Benchmark was 152.

SAT and ACT data for 2013–2014 were extracted from student test files as well as 2013–2014 graduation data. These files were matched with the fall PEIMS snapshot to identify G/T students. The number and percent

APPENDIX B (CONTINUED)

of G/T test-takers, and the number and percent of G/T students scoring an 1110 or higher (critical reading and mathematics) on the SAT and/or a 24 or higher composite on the ACT were analyzed to determine participation and performance.

DATA ANALYSIS

Basic descriptive statistics were employed to analyze the data. For enrollment by grade level and campus, frequencies were calculated. For survey items, the responses for each category were tabulated and/or percentages calculated. Due to rounding, some totals may not equal 100 percent. To determine the percentage of students scoring above grade level on the Iowa and Logramos, the percentage of students that scored a 61 NPR or higher was analyzed at the campus and district levels.

G/T participation rates in AP testing for each campus were calculated by dividing the number of G/T students tested by the G/T PEIMS enrollment for grades 9–12. AP/IB performance was calculated by dividing the number of G/T AP/IB test-takers scoring a three/four or higher by the total number of G/T AP/IB tests taken.

G/T PSAT participation rates for each campus were calculated by dividing the number of G/T students tested by the G/T PEIMS enrollment for grade 11. Performance on the PSAT was measured by dividing the number of G/T students meeting the College Readiness Benchmark of 142 by the total number of G/T students tested in grade 11.

SAT and/or ACT participation was analyzed by using an unduplicated count of G/T ACT and/or SAT test-takers and dividing by the G/T graduates for that year. SAT Performance was measured using the benchmark defined by Texas Academic Performance Report (TAPR) as well as the College Board benchmark. The SAT TAPR benchmark for college readiness was measured by taking the number of G/T students meeting the SAT standard of 1110 or higher on the reading and mathematics sections only and dividing by the total number of G/T students tested on the SAT. For the ACT, the number of students meeting the composite score of 24 or higher was divided by the number of G/T students tested. For the SAT College Board college readiness benchmark, the number of G/T students meeting the standard of 1550 or higher on the reading, mathematics, and writing sections divided by the total number of G/T students tested.

DATA LIMITATIONS

Using the PEIMS database presents an undercount of identified students because students identified after the PEIMS fall snapshot date will not be included. For example, HISD conducts a universal assessment for identifying G/T students in kindergarten. Once identified, they must be served by March 1st. The results of the assessment falls after the PEIMS fall snapshot date. However, the identified students are coded as G/T using the Chancery Student Management System (SMS). Although the fall PEIMS database is used for funding and compliance, it is important to review data in Chancery SMS to gain a more holistic picture of the Vanguard Program.

Professional development course numbers were provided by the Advanced Academics Department and an extract of G/T teachers was extracted using HISD e-TRAIN. Limitations exist since some professional development activities were not tracked on e-TRAIN because campuses may have hired their own trainer, or teachers may have attended training at the AP Summer Institute at Rice University, and the training was not recorded through e-TRAIN, resulting in an undercount.

On the Vanguard Standards Review, if duplicate data were submitted, the latest version was used in the analysis.

G/T MATRIX KINDERGARTEN–GRADE 1

Gifted and Talented Admissions: 2015-2016

To be coded "G/T" on the District PEIMS report the students must have a G/T Identification Matrix score that meets either number one or two below:

- 1. 62 POINTS OR ABOVE:** Total G/T Identification Matrix points of 62 points or above which includes the following:
 - Ability score (age based SAS score)
 - Achievement score (local percentile rank)
 - Grades
 - Teacher Recommendation
 - Obstacles (if applicable)
- OR**
- 2. TEST QUALIFIED:** Total G/T Identification Matrix points of 56-61 and meets the following test criteria:
 - Iowa/Logramos Achievement score that totals 20 points or above AND CogAT 7 score that totals 10 points or above.

TEACHER RECOMMENDATION FORM RUBRIC FOR 2015-2016

Calculate points for each line item on Teacher Recommendation form with rubric provided. Add all points and total on G/T Identification Matrix.	Consistently, most of the time	5 points
	More than half the time	4 points
	About half the time	3 points
	Less than half the time	2 points
	Rarely	1 point

HISD KINDERGARTEN REPORT CARD EVALUATION RUBRIC FOR 2015-2016

Students applying to Kindergarten or first grade, use the most recent 9 weeks completed. Add the total points the student earned in the core content areas only (Language Arts, Math, Science, and Social Studies). Find the point total for the appropriate nine weeks and look to the right for the Matrix Points. Do not calculate the grade percentage; it is already done. Total score does not include: Social Development/Social Studies, ESL, Health and Physical Development, or Fine Arts.

Kindergarten (English/ESL) - Montessori			Matrix Points
2nd Nine Weeks	3rd Nine Weeks	4th Nine Weeks	
134-141 points	137-144 points	143-150 points	20 points
127-133 points	130-136 points	135-142 points	15 points
120-126 points	122-129 points	128-134 points	10 points
113-119 points	115-121 points	120-127 points	5 points

95-100 or A to A+			20 points

APPENDIX D G/T PRESS RELEASE

HOUSTON INDEPENDENT SCHOOL DISTRICT

HISD Press Release

HISD Board of Education approves G/T policy focusing on equitable access for all students

Students previously identified as gifted no longer have to requalify in fifth grade.

Nov. 12, 2015 — The Houston Independent School District Board of Education approved the first reading of a policy revision that would provide students with more equitable access to the district's gifted and talented program.

The proposal is designed to ensure that students identified as gifted are able to retain that designation and remain in the district's gifted and talented program throughout their tenure in HISD, no matter which school they attend.

Currently, all HISD students are tested for the gifted and talented program in kindergarten and then again in fifth grade. During the 2013-2014 school year, more than one-third of the district's 3,527 gifted fifth graders were removed from the program after taking the requalifying test in fifth grade. The vast majority of exited students — more than three-quarters — were Hispanic.

"We hope this goes a long way in making sure all students — no matter their background — have equal access to the district's gifted and talented program," said HISD Superintendent Terry Grier, who earlier this year directed the district's Equity Council to review the program and identify a solution that would ensure equitable access for all students. "If you've been identified as gifted, you shouldn't have to continue to prove it."

More than one-third of white students in HISD are labeled as gifted and talented, while just 14 percent of Hispanic students and seven percent of African American students receive the same designation. Similarly, students from wealthier families are more than twice as likely to be labeled as gifted and talented than their peers from poor families.

The average number of gifted and talented students across the state is just eight percent, compared to 15 percent in HISD.

A gifted and talented label gives students — and the schools they attend — a financial advantage, which is why ensuring equity in the process is important. HISD schools receive \$400 in additional funding for every gifted student enrolled. Vanguard magnet schools, which are specifically designed for gifted and talented students, receive another \$400 per student on top of that.

Additional changes included in the policy update include an expansion of content areas in which students can be considered gifted and receive academic support. Previously, HISD focused solely on core academic areas, but now will also consider creativity, the arts and leadership. Adding the three new

APPENDIX D (CONTINUED)

G/T PRESS RELEASE

content areas ensures the district is better aligned with the state's education plan for gifted and talented students.

Schools also would be required to develop personalized Gifted Education Plans detailing how they plan to meet each gifted student's individual academic needs, and establish campus-based committees to help identify gifted students and develop and carry out the personalized plans.

The Board of Education must approve a second reading of the proposal before it goes into effect.

APPENDIX L

GIFTED AND TALENTED TEACHER AND COORDINATOR SURVEY QUESTIONS AND RESULTS, 2015

1. Describe the Gifted and Talented Program on your campus:

A total of 211 teachers or coordinators provided at least one response from 57 schools, with 69 providing no response. There were 14 positive and 19 negative comments that didn't provide relevant information on the G/T program.

- Identified students (N=23) in our Vanguard Magnet/Vanguard Neighborhood Program are in cluster/homogeneous classes (N=74) with a G/T trained teacher (N=42) providing differentiated instruction (N=44) throughout the four core content areas.
- Nonexistent or None (N=15)
- Students are served through Prep-AP/AP classes (N=30), Extracurricular activities, clubs, and competitions (N=7), Creative/Leadership activities (N=3), Extra work (N=3), Projects/Presentations (N=40), G/T Expos (N=29), other curriculum outside of core foundation such as technology, engineering, or fine arts (N=6), and/or Field trips (N=4).
- The IB Program/IB Candidate lends itself to student exploration, constructivist/inquiry based approach to learning (N=5).
- N/A or No Comment (N=8)
- Don't Know (N=11)

2. What program design do you implement?

Table 2. G/T Program Designs

N	%	Item
49	17.5	Homogeneous classes
93	33.2	Cluster Classes
60	21.4	Both Cluster and Homogeneous
74	26.4	I don't know
4	1.4	No Response
280	100.0	Total

3. What strategies are used to serve gifted and talented children? Please choose all that apply.

Table 3. G/T Strategies Used

N	%	Item
131	12.4	Acceleration
91	8.6	Curriculum Compacting
100	9.5	Developmental Language
247	23.4	Differentiation
158	15.0	Leadership activities
219	20.8	Creative activities
108	10.2	Social and emotional needs
1,054	100.0	Total

APPENDIX L (CONTINUED)

GIFTED AND TALENTED TEACHER AND COORDINATOR SURVEY QUESTIONS AND RESULTS, 2015

Other strategies (please specify)

A total of 19 participants provided at least one response.

- Focus on earning college credit through AP classes (N=2)
- Independent Investigation Method (IIM) (N=3); Higher Order Thinking Skills (HOTS) (N=1), Project Based Learning (PBL) (N=3), Vanguard Icon Strategies (N=1), TPSP (N=2), Leadership (N=1), Odyssey of the Mind (OM) (N=1), UIL (N=1), GT EXPO (N=1), College Board skills and curriculum (N=1), Montessori Curriculum (N=1), None/Don't Know (N=3), International Baccalaureate Organization Primary Years Program includes strategies listed above (N=2), Fine arts classes (N=1), Extra Credit (N=1), Strategies from Harvard (N=1), technology based activities (N=1), No Place for Hate (N=1), [school name omitted] Helping Hands (N=1).

4. Of the above options, do you think the gifted and talented children are having their needs met?

Table 4. Percentage of Respondents Indicating G/T Needs are Met

N	%	Item
77	27.5	All of the time
185	66.1	Some of the time
11	3.9	None of the time
7	2.5	No Response

5. What methods do you use to communicate to your parents about how your program is implemented?

A total of 243 participants provided at least one response. Fifteen respondents did not specify any method of communication. Fifteen respondents indicated they did not communicate information about how the G/T program was being implemented. One respondent indicated they didn't know, and 12 respondents indicated N/A.

- Campuses may have listed more than one method of communication. The top three categories were Mass phone calls/phone calls/text messages (N=53), Letters Home (N=51), and email (N=44).
- Other methods of communication included: Meetings/Open House/Family Nights (N=44), Newsletters (N=35), Web (e.g. school website, district website, Livingtree.com, Grade speed) (N=29), Parent-Teacher Conferences (N=24), Communication folder/Notes home (N=22), Face-to-Face (N=16), Flyers (N=16), Written communication (N=14), Syllabus (N=10), Homework (N=8), Oral communication (N=8), Progress Reports (N=4), Students communicate with parents (N=4), Class Dojo App (N=4), Report Cards (N=3), G/T Expos (N=3), Twitter/campus blog (N=2), School Calendar (N=2), HUB (N=1), and Teachers (N=1).

APPENDIX L (CONTINUED)

GIFTED AND TALENTED TEACHER AND COORDINATOR SURVEY QUESTIONS AND RESULTS, 2015

6. As a classroom teacher, how many student referrals for the G/T Program did you make? If you did not have a classroom, please skip this question and continue to #8.

A total of 186 participants provided at least one response, with 67 respondents indicating that they did not refer any students.

- Aside from the respondents that indicated they did not make any referrals, the number of referrals ranged from 1 to 50, with the average number being 5, the median being 3, and the mode being 2.
- Twenty-two respondents made comments such as "I am not sure of the G/T referral process", "I am not sure," "All our students are G/T," and "As a fifth grade teacher, I referred all my students."

7. As a coordinator, how many teacher referrals were made for students for the G/T Program?

A total of 87 participants provided at least one response, with 15 respondents indicating that none of their teachers made any student referrals for the G/T program.

- Aside from the respondents that indicated none of their teachers made any G/T referrals, the number of reported referrals ranged from 1 to 50, with the average being 20, the median being 17, and the mode being 10.
- Twenty-six respondents made comments such as, "Unsure," "Don't Know," and "Our teachers talk to parents to refer them for our program so no teacher comes directly to me for referrals."

8. How many parents refer or nominate a student for G/T services in your classroom or campus?

A total of 201 participants provided at least one response, with 57 respondents indicating that none of their parents nominated students for the G/T program.

- Aside from the respondents that indicated none of their parents made G/T nominations, the number of reported nominations or referrals ranged from 1 to 1,056, with the average being 24, the median being 3, and the mode being 2.
- Seventy-five respondents made comments such as, "Unsure," "Don't Know," and "Approximately 2/3 of our referrals are made by parent request. This year (excluding kindergarten), we tested a total of 73 students."

9. Any comments about the G/T Program?

A total of 103 participants provided at least one response, with 38 respondents indicating they had no comment about the G/T program.

- Positive (N=14) and Negative (N=10) comments comprised the two categories with highest number of responses.
- Assistance Needed (N=10), Student Assessment (N=9), Training (N=8), and Program Design (N=7), and Curriculum (N=7) made up the remaining categories.
